INGENIEUR DÉVELOPPEMENT FULLSTACK SFEIR - FUNDSQUARE

As a senior developer, I mostly manage the collection platform to get data, processing, wrangling, cleansing. Main collected data are Priips EPT, Mifid EMT, EET, ...

As a tech lead, I coordinate teams, draft architecture, and organize activities with all stakeholders to reach a stable and technically viable solution, matching the target vision.

I design and develop most of the patterns like data layers, orchestration, choreography, distributed transactions, event-driven communication, business monitoring, contract specifications with JSON schema, code generators for deployable microservices and for API clients, DevOps tooling scripts for local development, delivery and troubleshooting.

The stack is composed of several layers around these main technologies:

- SpringBoot, Camunda BPM, Kafka, Trifacta, Camel, MsSql, Mongo, Elasticsearch, Kubernetes, AKS, ESB, Openshift, React, GraphQL, Node.js

We are working in collaboration with Bourse du Luxembourg architecture team to evolve to a modern solution, cloud-native in Azure.

Over 5 years, we completely moved from legacy tomcat+mssql+esb to distributed event-driven microservices+mongo+kafka cloud native.

Since Fundsquare's acquisition by Fe Fundinfo, the short-term target is to move completely cloud native, and integrate their platform.

VINCENT MELLANO

I had the chance to work with Ludovic at the European Parliament for about 2 years.

The way he can deliver quality software on a very short time using cutting-edge technologies is very impressive.

His experience and ability to foresee problems at the very first phases of the project helped us a lot while taking decisions.

I would recommend Ludovic to anyone looking for a highly skilled, effective and professional software engineer.

PIERRE-ANTOINE GREGOIRE

Ludovic is a very talented person. He can tackle hard tasks in a short schedule while maintaining the quality of the result. He was an invaluable partner during the time we spent working in the same service of the European parliament, and I can't wait to work with him again in the future years if it is made possible.

In the meantime, I can only recommend him to anybody looking for a capable professional, who doesn't lack neither the ability to learn nor an advanced existing technical knowledge.
